

# Wengi

## too much a good thing

Wengi is a primocane raspberry variety with an enormous yield. Many other varieties fall far behind in this regard. The raspberries have a beautiful bright colour, a long shelf life and their quality remains good during transport. Moreover, this variety tolerates high temperatures and is easy to grow.

Wengi starts production early. As a primocane, the plants already produce laterals and those produce raspberries immediately.

This variety produces rather round raspberries with a fine, fairly bright colour and excellent flavour. They are firm and also easy to pick.

Wengi appears particularly suitable for growing in areas with a moderate or a Mediterranean climate.

- Very high yield
- Good shelf life
- Suitable for long transportation

Recommended number of canes per linear meter (at a row distance of 2 meter):

 Autumn crop	5 to 6
 Spring crop	2 to 3

Autumn crop in the Netherlands

 Average fruit weight	5 grams
 Primocane yield	2.6 kg/m <sup>2</sup>
 Days after Polka	5
